Article Quality Quick Reference Example

This sample quick reference is based on Consortium for Service Innovation Member material

Quick Reference for KCS Knowledge Base Article Structure

Our goal is for all knowledge base articles to follow the Knowledge Base Structure Guide <link is provided to full structure guide>. For an overview of content styling options for <knowledge tool>, refer to the <link to tool style guide>

Issue / Solution Article

Title

Title should be relevant, containing the main issue, and use customer and search-friendly wording. Consider how a customer titled a related ticket or would ask for help using search or an AI chatbo.

Issue

Short description of the issue representing the customer's perspective and context.

Product

Name of the product or service.

Cause

Optional field to describe the underlying cause of the issue being as specific as possible in your explanation of the issue and using simple language. Avoid advanced terminology, jargon, and acronyms.

Resolution

Describe how the reader would solve the problem in a short, step-by-step guide.

Additional Information

Optional field to highlight important supplementary information.

Examples of Issue / Solution Articles
